

# RAVISHANKAR JAYARAMAN

Architect | Full Stack Developer

✉ ravijshankar@gmail.com    ☎ +91 9962553521    📍 Chennai, Tamil Nadu, India

## PROFESSIONAL SUMMARY

Full Stack Developer with 18+ years of experience designing and building scalable web and mobile applications. Strong expertise in backend development using Java, Spring Boot, Node.js, and RESTful APIs, along with frontend and mobile development for Android and iOS platforms. Experienced in end-to-end application development, cloud deployment, system architecture, and performance optimization. Proven ability to deliver high-quality solutions across enterprise and consumer applications.

## PROFESSIONAL EXPERIENCE

### Senior Architect (Full Stack Developer), *Brillio*

07/2023 – 06/2024  
Chennai, India

- Designed and developed scalable web and mobile-friendly applications using Java, Spring Boot, Node.js, and REST APIs
- Built backend services consumed by both web and Android/iOS clients
- Integrated Elasticsearch (OpenSearch) for high-performance search and analytics
- Developed frontend components using modern JavaScript frameworks.
- Implemented authentication, authorization, and API security using JWT and OAuth2
- Deployed applications on cloud infrastructure using Docker and CI/CD pipelines

### Full Stack Developer, *Universal Music Group*

08/2019 – 08/2022  
London, UK

- Developed full stack applications for music content management and streaming platforms
- Built RESTful microservices using Java and Spring Boot for mobile and web clients
- Developed UI features using JavaScript frameworks and integrated with backend APIs
- Implemented mobile-friendly APIs consumed by Android and iOS applications
- Optimized database queries and caching to improve performance and scalability
- Collaborated with global teams for end-to-end feature delivery

### Senior Mobile App Lead, *eBay Inc*

02/2017 – 08/2019  
San Jose, CA

- Led development of Android and iOS application features for e-commerce platform used by millions of users
- Developed mobile application components using Kotlin (Android) and Swift (iOS)
- Designed and built REST APIs using Java and Spring Boot to support mobile apps.
- Improved app performance and reliability through API optimization and caching strategies
- Worked closely with UX, QA, and backend teams to deliver production-ready releases
- Participated in App Store and Play Store release processes and monitoring

### Architect (Full Stack Developer), *Cognizant*

09/2010 – 02/2017  
San Jose, CA

- Designed and implemented enterprise-grade web and mobile backend systems
- Built scalable RESTful services using Java, Spring MVC, and Node.js
- Developed frontend modules using JavaScript, HTML, and CSS
- Provided API integration support for Android and iOS applications.
- Led technical design discussions and mentored junior developers
- Ensured system security, scalability, and high availability

### Senior Developer, *Polaris*

08/2005 – 09/2010  
India

- Developed enterprise web applications using Java and relational databases.
- Built backend services and business logic modules
- Designed database schemas and optimized SQL queries
- Participated in full SDLC including requirement analysis, development, testing, and deployment
- Delivered multiple successful projects for banking and financial clients

EDUCATION

|                                                               |      |
|---------------------------------------------------------------|------|
| M.Sc. (Information Technology), University of Madras, Chennai | 2008 |
| B.Sc. (Physics), RKM Vivekananda College, Chennai             | 2005 |

TECHNICAL SKILLS

|                                                                                          |                                                                                                               |
|------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Frontend</b><br>HTML5, CSS3, JavaScript, TypeScript, React/Angular                    | <b>Backend</b><br>Java, Spring Boot, Spring MVC, Node.js, NestJS, REST APIs, Microservices                    |
| <b>Mobile Development</b><br>Android (Kotlin, Java), IOS (Swift), Flutter / React Native | <b>Databases</b><br>MySQL, PostgreSQL, MongoDB, Redis                                                         |
| <b>Search &amp; Messaging</b><br>ElasticSearch (OpenSearch), Kafka, RabbitMQ             | <b>Cloud &amp; DevOps</b><br>AWS, Docker, CI/CD, Linux                                                        |

KEY PROJECT HIGHLIGHTS

- Mobile-Enabled Enterprise Platform**, Tech: Java, Spring Boot, Node.js, Android, IOS, AWS
- Developed backend APIs consumed by Android and iOS mobile applications
  - Implemented secure authentication and role-based access
  - Improved system performance by optimizing database and API response times
- Content & Media Management System**, Tech: Java, REST APIs, ElasticSearch, React, AWS
- Built scalable microservices for managing and searching large content libraries
  - Integrated ElasticSearch for fast and accurate search results
  - Designed responsive frontend interfaces and mobile-ready APIs
